19" Central office cabinet STP-19M

Features:

- 19'' rack cabinet designed for use in telecommunication central offices
- the modular design allows for the removal or replacement of each cabinet's element
- three-wing door structure – middle ones glazed (for STP-19M-K)
- top and bottom line cable entries
- in case of narrow or low passages leasing to the final location of the cabinet, it is possible to disassemble the cabinet into smaller elements
- easy cabinet conversion into its mirror image (used in case of setting cabinets backwards or sideways)
- the possibility of making a rack with a door and side and rear walls
- a pull-out storage shelf
- each door closed with a lock (for STP-19M-K)
- magnets holding the door in the closed position (for STP-19M-K)

Equipment:

- 3-piece rack
- assembly manual
- installation kit

Optional equipment:

- set of doors (glass, for riser cables and patchcords; for STP-19M-K)
- set of rear walls
- set of side walls
- set of connectors to hold the cabinets sideways
- cable management guide for side configuration
- documents pocket
