

Aerial distribution box NSR-12

Aerial distribution box NSR-12

Features:

- specially designed for FTTH
- used in aerial optical networks
- termination of 12 fibres
- 12 patching fields
- 8 drop entries
- UV proof plastic closure
- IP66 environmental protection
- possible introduction of uncut cable

Equipment:

- KSQ splice tray
- PG gland, cable ties
- dedicated bracket
- lock (optional)
- installation and handling instructions
- installation kit

Technical specifications:

	NSR-12
dimensions width/height/depth [mm]	180/255/65
0,9 mm buffered fibre pigtail length [m]	1
number of cable entries (6 to 8,5) mm	2
number of 6 mm cable entries	8
maximum splice/adaptor capacity	12
maximum cable diameter [mm]	ø8,5
