

R-01C - Fibre manifold

Features:

- accepts four WOD-10B corrugated tubes as the protection for the distributed outdoor cable loose tubes
- one corrugated tube holds up to 8 outdoor cable loose tubes
- used to feed the required fibre count bundles to PS-19 patch panels and the modules in PSU-1 cabinets
- organises fibres into the required fibre count bundles, that are routed in protective tubes directly to MPK-48 and MPK-72 modules

Technical Specifications:

	R-01C
number of cable entries	1 outdoor cable
outdoor cable outer diameter [mm]	8-16
maximum number of outgoing tubes	4
dimensions: width/height/depth [mm]	45/150/34
weight [kg]	0,2
mounting brackets position	3 x MS screws
