

R-02A

R-02A - Fibre manifold

Features:

- accomodates 24 x OFBLT-P-3.1-0.5-PP protective tubes used for outdoor cable fibre distribution
- groups outdoor cable fibres into 12-fiber budles in protective tubes in MPS-12 and MPK-12 modules
- fibres from different outdoor cable loose tubes can be insetred into one protective tube
- used to feed the required fibre count bundles to PS-19 patch panels and the modules in PSU-300 cabinets
- enables several optical distribution modules to be feeded with fibres from one fibre optic cable

Technical specifications:

	R-02A
number of cable entries	1 outdoor cable
outdoor cable outer diameter [mm]	16-21
maximum number of outgoing tubes	24
dimensions: width/height/depth [mm]	44/150/37
weight [kg]	0,2
mounting brackets position	3 x MS screws
